

Microchip Consent Form

HOMEAGAIN – Pet Microchip Identification System is the most complete nationwide system for recovering lost or stolen pets. It utilizes a tiny microchip, the size of a grain of rice, which is implanted between the animal's shoulder blades. Individual numbers are registered in the national database managed by Companion Animal Recovery, a division of the American Kennel Club. When a lost pet (cat, dog, etc.) arrives at a participating animal shelter or veterinarian clinic, a Universal Scanner is used to identify the unique encoded number on the implanted microchip and the owner is identified and contacted immediately. This procedure takes just seconds and is relatively painless, and is recommended for companion pets of all species, breeds and ages.

Microchip Identification

Prepare for disaster. Very few lost pets find their way home without permanent identification. We can implant a MICROCHIP while your pet is sedated for \$ 50.00 () YES () NO
