## PRE-SURGICAL ANESTHETIC BLOODWORK RELEASE

### ***PLEASE READ CAREFULLY***

Anesthesia must be metabolized (broken down) by the liver and kidneys. It is recommended that bloodwork be performed prior to anesthesia to ensure proper function of these organs. Bloodwork will not guarantee that there are no anesthetic or surgical risks involved; however, it provides better insight to your pets general health.

### **PRE-ANESTHETIC BLOODWORK IS REQUIRED OF PETS OVER 8 YEARS OF AGE.**

\_\_\_\_\_ **YES**, I would like my pet to have pre-anesthetic bloodwork for a fee of \$40.

PROFILE INCLUDES:

- ALANINE AMINOTRANSFERASE (ALT)-LIVER
- ALKALINE PHOSPHATASE (ALKP)-LIVER
- CREATININE (CRE)-KIDNEYS
- TOTAL PROTEIN (TP)-HYDRATION
- UREA NITROGEN (BUN)-KIDNEYS
- GLUCOSE (GLU)-SUGAR LEVEL

\_\_\_\_\_ **NO**, I do not want my pet to have pre-anesthetic bloodwork.
